- The deadly fights of NOXIOS IV, the planet known as "The Cage" among the most experienced travelers of the galaxy. Are you brave enough for the challenge? We hope you are not afraid of closed spaces!
- The dizziness-inducing climb of TAMUKAME, the planet that offers an incredibly towering itinerary to all the galaxy journeyers who love hardcore climbing. But be wary, boxes are heavy!
But watch out: there can only be one winner!

Put your \$1 in your pocket. So not worth it. \$1 for 3 poorly designed levels with what can be described as weak at best competitive multiplayer. There is no actual competition. Levels drag on with too much time per round. No real game play or strategy. The only reason I don't request a refund is that in hopes that my \$1 could possibly fund some improvement.
